

Customer Support & Product Intelligence Report

Reporting Period: July 2026

Executive Summary

Customer satisfaction has declined slightly due to recurring performance issues in the analytics dashboard. Enterprise customers continue to report slow response times during peak business hours. Several feature requests have also been consistently submitted through customer support channels.

Top Customer Complaints

Slow dashboard loading for enterprise accounts.

Dark Mode is not available.

Dashboard export to PDF is missing.

Slack integration has been requested by multiple customers.

Mobile push notifications are delayed.

Product Feedback

Most requested features:

Dark Mode

PDF Export

Slack Integration

Microsoft Teams Integration

Dark Mode has been the most requested feature for the last three months.

Engineering Updates

Completed:

Login timeout issue fixed in Release v2.4

PostgreSQL indexes optimized.

Dashboard loading performance improved by 40%.

Session management optimized.

Known Issues:

Dashboard widgets occasionally fail to refresh.

Notification service has intermittent delays.

Analytics page memory usage remains high.

Business Impact

Enterprise customers account for the highest number of support tickets.

Key observations:

82 feature requests related to Dark Mode.

74 requests for PDF Export.

55 requests for Slack Integration.

40 reports of notification delays.
Recommendations
Prioritize Dark Mode implementation.
Release Dashboard PDF Export.
Improve dashboard caching.
Rewrite notification service.
Add Slack integration in the next product release.
Expected Questions for Your RAG App

After indexing this PDF, you should be able to ask:

What are the top customer complaints?
Which feature requests are most common?
What issues remain unresolved?
Which release fixed the login timeout bug?
What improvements should the product team prioritize?
Summarize engineering updates.
Which customer segment is most affected?
What business recommendations are provided?

This document is designed to work well with your Product Intelligence Workspace and complements the TXT and Markdown files you already created.
